AUTUMN WINTER
BE INSPIRED

WWW.BC-FASHION.EU

At B&C, we're committed to creating
**great garments at the best price
in a sustainable way.**

All our products are made
with **care and consideration
for the people who make them
and for the environment.**

B&C
COLLECTION

inspired tomorrow_°

Our **B&C inspired tomorrow_°** products are created with an extra consideration for the planet: each piece is made of more sustainable materials, like Better Cotton, Organic In Conversion Cotton, Organic Cotton or Recycled Polyester.

At B&C we're committed to creating beautiful and fashionable garments at the best price in a sustainable way. All our products are made with care and consideration for the people who make them and for the environment.

Garments containing more sustainable materials can be found across the collection – just look for our green **inspired tomorrow_°** labels!

So, what do we count as **inspired tomorrow_°**?

To qualify for a green hang tag, a product must contain **sustainable materials, such as Better Cotton, Organic In Conversion Cotton, Organic Cotton or Recycled Polyester.**

To evaluate the materials, we use external certifications.

By choosing **B&C inspired tomorrow_°** products, you help us make the textile industry more sustainable!

Sustainable material

In the most recent years, we have seen a **worldwide trend for organic products**, whether in food or non-food sectors. This is also valid for Organic Cotton (a cotton that is not genetically modified, and that is grown without any chemical inputs).

Organic Cotton only represents less than 1%* of worldwide cotton production.

This low figure is due **to soil or weather conditions** in many parts of the world that make organic farming not possible, but also to the more labour intensive and demanding organic farming practices.

Optimistic scenarii consider that Organic Cotton proportion can hardly reach 5%** by 2030.

Sources: *Textile Exchange and **Better Cotton

Organic Cotton
only represents
less than 1%*
of worldwide cotton
production

The best way to increase the amount of sustainable cotton produced is then to widely promote better farming practices.

The objective is to train the farmers to better manage irrigation, use less chemicals, at the right moment, to preserve biodiversity,... in order to increase yields and improve their livelihood.

This is what Better Cotton does in many cotton producing countries.

B&C
more sustainable
material evolution

X4 2019
2021

4X
HIGHER
IN 2021
VS 2019

Cotton counted for almost 90% of the fibres used by B&C in 2021

Cotton is a natural fibre that delivers the greatest softness for skin and is easily printable. It grows in subtropical regions, when not properly cultivated, it may require abundant chemical inputs and irrigation.

Therefore, The Cotton Group - B&C is increasing its share of "more sustainable cotton", by introducing product ranges made of Better cotton, Organic In Conversion Cotton or Organic Cotton.

Organic In Conversion

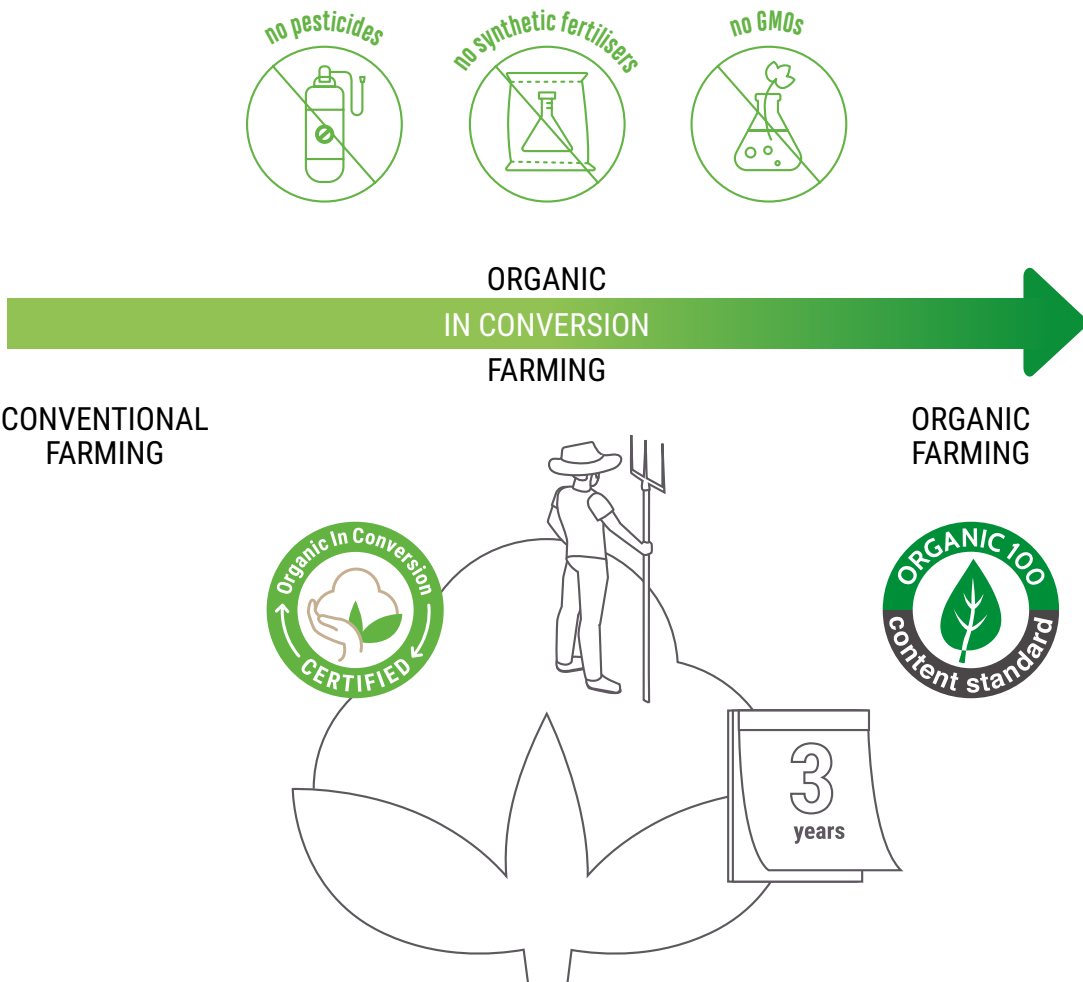

Organic Cotton grew to be so in demand while its supply remains below 1% of global cotton production. But the transition period is so hard for cotton farmers that very few of them can afford to embrace that path.

Clearly, it needs some help from the brands in advancing the cause of sustainability. So, at B&C, we made a decision: embarking on the promising path of Organic In Conversion Cotton.

Organic "In Conversion" Cotton is grown on land which has started the conversion to organic methods.

Although farmers follow organic farming guidelines (no use of pesticides, synthetic fertilisers, GMOs and other harmful chemicals) their soil can not yet be considered organic.

This conversion period (up to 3 years) is very difficult for farmers, who experience economic and harvest consequences.

"We are committed to training and converting farmers to adopt organic farming practices, supporting them on their 3-year journey to organic certification."

What is Organic In Conversion Cotton?

Organic In Conversion Cotton is the fibre that farmers produce while transitioning from conventional to organic farming. To obtain organic certification, cotton farmers must observe all the rules of organic agriculture and refrain from using any chemicals or GMOs from start to end of a 3-year transition period. It's as sustainable as Organic Cotton and certified Organic In Conversion.

Buying Organic “In Conversion” Cotton helps support farmers in transition, and allows brands to directly **connect with farmers’ communities** offering better traceability of our cotton journey up to farm level.

In 2022, B&C will be launching its first range of Organic “In Conversion” Cotton products.

Organic Cotton

Organic Cotton is grown using organic agricultural systems that replenish and maintain soil health and fertility, expand biologically diverse agriculture, and prohibit the use of synthetic toxic and persistent pesticides and fertilisers as well as genetically engineered seeds.

Third-party certification bodies (CBs) verify that organic producers meet strict national regulations addressing methods and materials allowed in organic production.

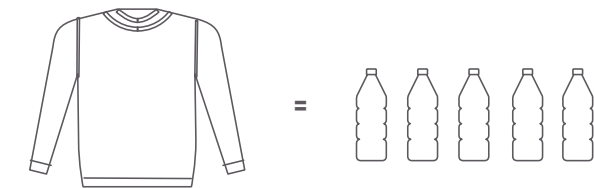

Recycled Polyester

Polyester is the most used fibre in the worldwide textile industry and accounts for about 60% of total fibres.

Polyester is a petrol based product and as such, it contributes to GHG emissions. This is why we have started switching from first generation Polyester fibres to Recycled Polyester in some Sweatshirts. Recycled Polyester accounted in 2021 for 13% of our Polyester use. Recycled Polyester transforms waste (old PET bottles) into a useful product (Polyester yarn) through a green and mechanical process.

RCS is a certification by Textile Exchange that guarantees the content of recycled fibres in our final garments.

Recycled Polyester uses up to 58% less water and reduces CO₂ emissions by up to 54% compared to virgin polyester

Every Recycled Polyester sweat-shirt we sell,
we remove 5 plastic PET bottles wastes from the environment.

This data is gathered using the 'Higg Material Sustainability Index'.

More information about
their data and methodologies
can be found on howtohigg.org

Better Cotton

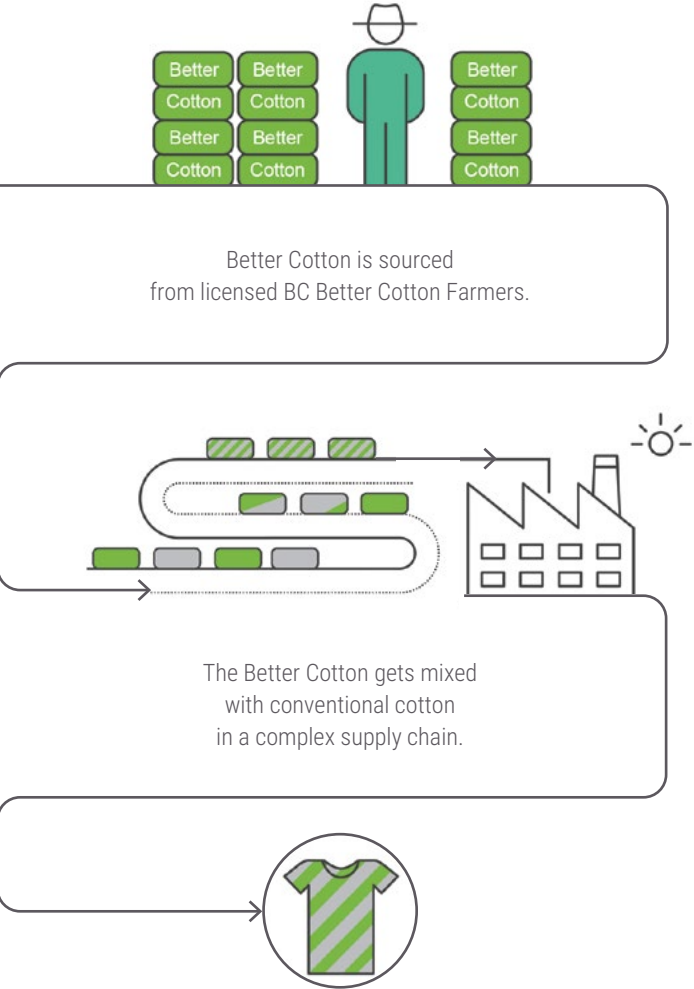

Better Cotton aims at helping cotton growers converting to more environmentally friendly, and socially and economically sustainable farming methods (more efficient use of water and chemical inputs), but also to meet growing consumers' demand for more sustainable cotton.

Fees paid by members also support trainings for farmers.

By choosing our ROYAL line cotton products, you're supporting our investment in Better Cotton's mission.

Those products are sourced via a system of **mass balance** and therefore may not contain Better Cotton.

The retailer has sourced the Better Cotton and Better Cotton Farmers have seen the benefit, but the Better Cotton may not be in the end product.

©bettercotton.org

The 2,4 million trained farmers are accounting now for about 23% of the worldwide cotton production

"It all began back in 2012, when a group of us, Better Cotton Farmers in Kanakya village, set up a committee to help other farmers in our community use pesticides and fertilisers more efficiently.

We wanted to promote plant-based natural alternatives, but they weren't readily available locally, so we had to find a way to make it easier for farmers to gain access to these products at reasonable prices.

And we also had to convince them to change their ways by showing them the results in the field."

Better Cotton Farmer Balubhai Parmar - "STORIES FROM THE FIELD" - bettercotton.org

B&C certifications & memberships

FAIR WEAR FOUNDATION

The Fair Wear Foundation (FWF) is a non-profit, multi-stakeholder organisation that aims to improve labour conditions in garment factories and is made up of more than 147 members.

Internationally and at regional level across garment production countries, the FWF advocates for the rights of garment workers while engaging with factories, trade unions, NGOs and governments. They develop a fair fashion norm by running brand performance checks, factory audits and trainings as well as managing a complaint helpline. In addition, they provide their members with base-line resources (e.g., Code of Labour Practices, training) and in-person follow-up with brand liaison in the field.

Our Brand Performance Score of 82% is one we are very proud of. It's a true recognition of our ongoing efforts towards the continuous improvement of working conditions in our partner factories. It helps ensure that over 5000 textile workers work in safe environments and earn a decent living.

This achievement has largely been possible thanks to the diligent work of our local team. 22 people in Dhaka who closely support and monitor the progress of our factories through regular visits ensuring agreed standards are met and there is no subcontracting.

TEXTILE EXCHANGE

Textile Exchange is a global non-profit organisation that works closely with their members to drive industry transformation in preferred fibres, integrity and standards, and responsible supply networks.

Textile Exchange identifies and shares best practices regarding farming, materials, processing, traceability and product end-of-life in order to reduce the textile industry's impact on the world's water, soil and air, and the human population.

Member of amfori, the leading global business association for open and sustainable trade. For more information visit www.amfori.org

AMFORI BSCI

In a context of complex supply chains, companies are expected to improve visibility over their production and to drive improvements across their supply chains wherever applicable. The amfori Business Social Compliance Initiative (BSCI) is an industry-driven movement enabling companies to improve social performance in their supply chains.

For this, amfori BSCI conducts audits to assess workplace standards across the global supply chain and ensure that all suppliers are treating workers ethically and legally.

PETA CERTIFIES B&C AS 100% VEGAN

We're proud to announce that we are officially certified by PETA as an approved vegan brand. It means there are no animal products involved in any part of the creation of our products. PETA (People for the Ethical Treatment of Animals) is the largest animal rights organisation in the world, with more than 6.5 million members and supporters. The companies that have signed PETA's statement of assurance have verified that neither they nor their ingredient suppliers conduct, commission, or pay for any tests on animals for their ingredients, formulations, or finished products anywhere in the world and won't do so in the future.

At B&C Collection, we believe that you shouldn't have to choose between something that looks good and something that does good too. That's why we are proud of our industry certifications.

BETTER COTTON

Better Cotton aims at helping cotton growers converting to more environmentally friendly, and socially and economically sustainable farming methods (more efficient use of water and chemical inputs), but also to meet growing consumers' demand for more sustainable cotton. Fees paid by members also support trainings for farmers.

By choosing our ROYAL line cotton products, you're supporting our investment in Better Cotton's mission.

For more information on Organic In Conversion Cotton click here

ORGANIC IN CONVERSION

Organic "In Conversion" Cotton is grown on land which has started the conversion to organic methods. Although farmers follow organic farming guidelines (no GMO, no chemicals, etc.), their soil can not yet be considered organic. This conversion period (up to 3 years) is very difficult for farmers, who experience economic and harvest consequences. Buying Organic "In Conversion" Cotton helps support farmers in transition, and allows brands to directly connect with farmers' communities offering better traceability of our cotton journey up to farm level.

You can identify Organic In Conversion Cotton certified products thanks to the Organic In Conversion Cotton logo on the product pages.

Certified by Control Union CU 1030092

OCS CERTIFICATION

The B&C INSPIRE T-shirts and sweatshirts are made with OCS certified Organic Cotton. Products certified to the "Organic Content Standard/OCS" contain organically grown content that has been (independently) verified at each stage of the supply chain, from the farm to the finished products. Organic Cotton is produced and certified to organic agricultural standards, which require practices to sustain ecosystems.

Our products made of Organic Cotton are certified by Control Union under certification number CU 1030092.

<https://textileexchange.org/standards/>

You can identify OCS certified products thanks to the OCS logo on the product pages.

Certified by Control Union CU 1030092

RCS CERTIFICATION

The "Recycled Claim Standard/RCS" verifies recycled content and tracks it from the source to the final product. The RCS verifies the presence and amount of recycled material in a final product. This happens through input and chain-of-custody verification from a third party. It allows for the transparent, consistent and comprehensive independent evaluation and verification of recycled material content claims on products.

Our products made of Recycled Polyester are certified by Control Union under certification number CU 1030092.

<https://textileexchange.org/standards/>

You can identify RCS certified products thanks to the RCS logo on the product pages.

OEKO-TEX

OEKO-TEX® certifies that raw materials, intermediate and end products at all stages of production contain no substance harmful to people or to the environment. The B&C Collection (blank products only) range of T-shirts, polo shirts, sweatshirts and shirts are certified STANDARD 100 by OEKO-TEX®.
